PREFACE

By 1988 the Second Edition of the List of Northern Specialists at Canadian Universities was already five years old and out of print, as well as considerably out of date. The Association of Canadian Universities for Northern Studies therefore decided to prepare a third edition, and this was made possible by a contract from the Department of Indian and Northern Affairs. The purpose for this third edition remains the same as for the previous two editions, i.e. to provide a source of information to those involved in northern research, to the university community at large, to native organizations, and to scientists and administrators both in government and in industry.

The information in this third edition is based entirely on replies to questionnaires sent out to university faculty during 1988. It does not draw on information contained in the earlier editions. A broad range of sources was consulted so that as many university specialists in northern studies as possible could be contacted. ACUNS Council members and others were also contacted and asked to disseminate the questionnaire widely.

The four basic sections of the previous list were kept (i.e. alphabetical list of specialists, list by universities, list by disciplines, list by geographical specialization) but the format of each of these was modified to make this third edition easier to use.

The first section is the master alphabetical list of specialists, which also includes addresses and telephone numbers, main discipline and current research or publications.

The second section is an alphabetical list of universities, with the names of their northern specialists; also included here are the addresses of centres for northern studies at the universities.

The third section is a breakdown by broad discipline of specialization,which gives name and university affiliation of specialists as well as their sub-disciplines.

The fourth section is a breakdown by broad geographical region of specialization, which gives name and main discipline of the specialists.

This third edition contains responses from 793 individuals, an increase of 22% over the number in the second edition (651). Forty-nine universities are represented in this edition.

Sincere thanks are due to Eileen van Heyst, Administrative Officer of ACUNS, whose efforts have largely been responsible for the production of this edition.

PRÉFACE

En 1988 la 2^e édition de la Liste des spécialistes du Nord dans les universités canadiennes était épuisée et n'était plus à jour. L'Association universitaire canadienne d'études nordiques se décida donc d'en préparer une 3^e dition, et ceci devint possible lorsque le Ministère des Affaires indiennes et du Nord Canada approuva un contrat envers la production de cette 3^e édition. Le but de cette édition demeure le même que pour les deux éditions précédentes, c'est-à-dire d'offrir une source d'information aux personnes engagées dans la recherche nordique, à la communauté universitaire en général, aux organismes autochtones et aux scientifiques et administrateurs du gouvernement et de l'industrie.

L'information dans cette troisième liste est entièrement basée sur les réponses reçues aux questionnaires envoyés au personnel universitaire au cours de 1988. Elle ne s'inspire pas de l'information contenue dans les versions précédentes. Plusieurs sources d'information ont été consultées pour que la nouvelle liste soit autant que possible complète. On a aussi demandé aux membres du Conseil de l'AUCEN et à d'autres personnes de distribuer le questionnaire à leurs collègues qu'on aurait pu oublier.

Les quatre sections de la 2^e édition ont été retenues, c'est-à-dire une liste alphabétique des spécialistes, une liste des universités et leurs spécialistes, une liste organisée par disciplines, et une liste organisée par spécialisation géographique. Le format de chacune de ces sections a cependant été modifié pour rendre cette troisième édition plus facile à utiliser.

Le première section est constituée par la liste alphabétique des spécialistes, et on y trouve aussi leur adresse et numéro de téléphone, principale discipline et sujet(s) de recherche ou publications.

La deuxième partie est constituée par la liste des universités, et donne pour chaque université les noms de leurs spécialistes et aussi s'il y a lieu, l'adresse de leur centre d'études nordiques.

La troisième partie regroupe les spécialistes par discipline principale et indique aussi leurs universités et spécialisations.

Enfin, la quatrième section regroupe les spécialistes par région géographique de leurs recherches.

Dans cette troisième édition on trouve inclus 793 individus, repartis parmi 49 universités. Ceci est une augmentation de 22 p.c. sur les 651 individus dans la deuxième édition.

On doit remercier sincèrement Eileen van Heyst, Administratrice de l'AUCEN, sans qui cette nouvelle édition n'aurait pu paraître.

Le Directeur général
Guy R. Brassard
